

## Asset Database

Asset magazine serves finance and investment professionals working in the financial planning and funds management profession. It aims to cut through the noise in the market and provide readers with insights into investment trends, practice management and product innovations.

Asset's focus on business management provides an invaluable guide for financial planners who are both practitioners and business managers.

The database is updated on a daily basis through magazine subscriptions, events and research and then entirely re-research annually by a dedicated research team.
