

Dentists Database

A compiled list of Dentists on a national basis.

Dentists depend on their mail for dental journals and product updates, which offers you the same opportunity to sell your products or services. Research shows that direct mail campaigns to dentists have a higher average response than most other consumer segments.

Approximately 70% of the file has telephone numbers and almost 2,500 records have fax numbers. The list has been meticulously compiled and continues to be updated on a weekly basis
