

## Dunstable AUS/NZ

A list of companies and individuals sourced from the Australian Securities Commission and business research. This file is made up of registered companies at their head office address and personalised to the CEO, Managing Director, Director.

The information is initially sourced through the Australian Securities Commission for credit checking purposes and then further enhanced by telemarketing.

In addition to being able to identify Directors/Managing Directors of Australian companies by industry groups or SIC codes, Dunstable is one of the only databases offering information about the company itself. This includes the number of years in business and whether the company is a brand or a subsidiary, and the parent company involved. This list is fully personalised including business titles and allows the list user to target in on the sector of the market that really matters.

This list is widely used in direct mail, market research and direct marketing, and can be tailor made to suit the user's customer or prospect profile.
