Australian Business Establishments

This is the ultimate database for reaching every Australian Business. There are approximately 1,000,000 businesses that can be further segmented by any of the 1,000 Standard Industry Classification (SIC) codes.

The database contains company name and address and each record contains telephone numbers with over 110,000+ records with fax numbers and 34,500 with mobile phone numbers. A generic title of your choice can be added.

This is the only database that will reach hard to find business categories and offers an outstanding opportunity to reach difficult and obscure target markets at a low price.

Use this database as a base to grow your own customer/Prospect house file. The data is provided on a purchase basis at no extra cost.

LIST DETAILS	
Quantity	1.1+ Mil
Selections	State Postcode Standard Industry Classification (4 digit) Industry
PRICING	
Minimum Order	1,000
Deliverability	90%
