Call Centre & Help Desk Managers

Contacts on the list (made up from the central Incnet database) have been meticulously researched to determine their position. Each contact listed is the decision maker and responsible for the smooth running of their area of responsibility. It is important to note that a proportion of the decision makers are not located at the same physical address as the call centre.

Hard to reach individuals such as Call Centre Manager, Reservations Managers and Help Desk Managers can be accessed using this file but there is also a variety of other mixed job titles that undertake the call centre and help-desk responsibility such as; General Managers and IT Managers.

The majority of companies on this list are companies with 100+ employees.

All records are personalised including salutation, first name, surname and business title.
