Manufacturing & Industrial Database

This list provides an excellent base for targeting decision makers in the area of Australia's industrial market.

Australian Mining

This Magazine reaches an audience specifically interested in mining equipment and services. It is read by executives who influence the company's purchases.

Factory Equipment News

This is Australia's leading manufacturing industry publication. It provides a concise source of new equipment and new technology information for key buyers and buying influences in manufacturing. FEN is read by those with the greatest buying power, mainly general and technical managers as well as engineers.

Process & Control Engineering

The publication covers subjects in control, sensing, instrumentation, process engineering and environmental protection. The subscribers to this publication are engineers, managers and technicians.

Metal Working

Metal Working reaches top decision makers in sheet and plate fabrication as well as in machining and cutting. Readers include metal fabrication contractors and manufacturers in sectors ranging from general jobbing, white goods, air conditioning and lighting to automotive, tool making, aerospace and ship building.

Food Processor

This publication aims to give food industry decision makers the best information on which to make vital business decisions concerning plant equipment, technology, materials, ingredients, packaging, handling and distribution. Food Processor caters to a specialist audience of production managers, chief chemists and food technologists.

Plantline

Plantline reports on Australia's manufacturing industry. It represents the changing face of industry in this country and the way that we interact within it.

Packaging keeps readers informed on business, issues and the solutions affecting one of Australia's most dynamic industries. Two thirds of packaging's readers work for manufacturing firms, including food, beverage, confectionery, textiles, cosmetics and chemicals. Other readers include suppliers of raw material and packaging machinery, converters and package manufacturers.

In total there are 69105 records of which 39841 records are personalised. State by state breakdowns below reflect personalised record count
