Monument

Monument is Australia's 'must read' architecture and design magazine. High production values and quality writing ensure a product which is not only a valuable source of information but an object of design within itself. Viewed more as a book than a magazine, the issues are highly collectable and enhance any reader's resource library.

Monument's mission is to be right there alongside the architects and designers who are shaping the environment we live in. From the large scale urban projects that are shaping our cities, to the buildings and landscapes that fill our public domain, to projects showcasing the latest advances in technology, innovated solutions to contemporary housing and the designers developing refined products.

While many of the readers are architects and designers, an ever increasing number of those choosing to subscribe are not. They represent the growing number of people who are increasingly informed about the many aspects of design and who are choosing to take control of improving the quality of their environments in all aspects of their lives.

Records are Personalised.
