## Quality Manager

A list of Quality Assurance managers (made up from the central Incnet database) responsible for ensuring a firm's products/service meet relevant Australian or international Standards. A majority of companies on the file are turning over in excess of \$10 million and/or 50 + employees.

This list is meticulously compiled and over twenty industry codes and a growing selection of industry keywords allows the list user to efficiently zero in on their industry target markets. Updating is maintained on a continual basis. All contacts on the file are researched every three months. This is supplemented by monitoring of media, other published information sourced and dead mail.
