New Scientist

This is the Australian and New Zealand subscriber base of the worlds leading scientific current affairs publications NEW SCIENTIST.

New Scientist covers a wide range of scientific fields and issues including Consumer Technology, Natural Resources, The Internet, Environmental Issues, Telecommunications, Space Technology, Drug Development, Human Nature, Politics and Economics.

New Scientist readers are opinion formers from diverse professional backgrounds. Readers are predominantly men, with a high skew to the AB business decision-making socio group.

Readers are more likely to be between 35 - 49 years old and work in a full time Professional or Management position.

More than half New Scientist readers hold a university degree and 13% are doctors or lawyers.
