Quotable Value (QV On-Line) Database

The QV On-Line New Zealand Database is the most comprehensive, detailed and up-to-date mailing list available. The information is collected from a public register (the District Valuation Roll) and from the District Valuation Roll supporting data held by territorial authorities. The file is then overlaid with meshblocks.

The list offers detailed information on over 500,00 commercial properties, detailed information on over 1.27 million residential properties and accurate names and addresses of over 2.4 million property owners. Accurate names and addresses can also be supplied for properties used for rural purposes. The list can also identify names and addresses for recent home buyers and rental property owners. The list in fact, has many segmentable fields of information for example, if you advertise prestige vehicles the list owner can provide a mailing list of owners of a house worth over \$400,00 and with drive on access and allocated car parking facilities. All records are personalised with titles.

LIST DETAILS	
Quantity	1.4 Mil
Selections	Region Gender Age Property Owner Details Residential households Lifestyle Property Owners Property investors commercial Property Owners Home for Sale Land Value Improvement Value Age of Property Type of property Rural - farm
PRICING	
Minimum Order	5,000
